

ATOS Hardware Agnostic Approach for Quantum Computing

Olivier Hess^a

a) *ATOS Quantum Computing*

This presentation will cover an introduction to quantum computing, the current state of developments and the main challenges towards the future development of universal quantum computers, as well as the solutions developed by ATOS (ATOS Quantum Learning). The second part of the talk will address the main use cases and fields of application of quantum systems. The ATOS partnerships Worldwide and the ongoing collaborations will be highlighted.
